Analyst/Analyst Team of the Year

"OPEN Health Evidence & Access is proud to sponsor the 'Analyst Team of the Year' Award. OPEN Health supports its clients in delivering value and evidence, through data informatics and analytics, so we are proud to recognise those who strive to gain insights which improve outcomes for patients and healthcare."

Analyst Team of the Year sponsored by

"The ability to take different sets of data, blend them together and create an informative, meaningful and action-oriented report is crucial for today's analyst. It's something we specialise in at 14 Four Analytics and so we are proud to sponsor this award as a way to recognise those individual analysts who are both skilled at data handling and able to make full use of their chosen reporting tool(s) to generate insight and information."

Analyst of the Year sponsored by

Awarded to the individual analyst/team of analysts who best showcase their skills in turning complex datasets into an interactive, engaging report that tells the story within the data

About the Analyst Team of the Year and Analyst of the Year Competitions

The analyst awards are a popular way for members to demonstrate their expertise without having to extract or export their in-house dashboards with the commensurate confidentiality issues.

Because everyone works with the same data sets, we start with a level playing field. Entrants can use any software they like to deliver the end result as long as the judges don't have to buy a licence to view it.

In the judging, submitted reports are marked on accuracy, clarity and ease of use. Contenders need to tell a good story and, also deliver a bit of a 'wow!' factor that draws the user in and encourages them to explore the information.

This year the brief for both the individual analysts and the teams centred around the global COVID-19 pandemic.

The judges were looking for an analysis of a complex set of global Covid-19 data, to illustrate the key issues around the global pandemic, delivered as an interactive dashboard, spreadsheet or an infographic.

For the team award, a higher level of complexity is expected, to reflect the teams' additional resources. So the teams also received a separate UK dataset, and were required to compare and contrast the global data with the UK data.

The BHBIA are very grateful to the organising and judging team, who put in many hours of hard work to design and assess the tasks, to ensure that this competition was a success.
